

POMAZKOV ARSENIY

FRONT-END DEVELOPER

EXECUTIVE PROFILE

I am a front-end developer with 2,5 years experience in building beautiful and functional UI for a huge variety of purposes – from online shops to API services.

Looking for new opportunities and eager to accept challenges!

PREVIOUS POSITIONS

MIDDLE FRONT-END DEVELOPER

VTB | 2020 – present

Working as a front-end engineer at the innovation department at one of the largest fintech companies. I am engaged in:

- API manager development using TYK management platform, including uploading, parsing, visualisation, editing and updating functionality for **.yaml** files (React, Typescript, Redux, Ant Design used);
- Authentication system development, including validations and error-handling (React, React-Router – no pre-made components used);
- API portal development on Drupal 8 (twig template engine, custom hooks and theming);
- Project management – being responsible for an innovative AR project, communication with vendors and internal departments.

FRONT-END DEVELOPER

Upwok | 2020

I started my career at the international freelance platform – Upwork. I worked on various projects from fixing legacy code to developing new functionality in big and already working systems.

Not only it helped me to level up my spoken English, I also learnt to communicate with different types of clients and to find ways of reaching agreement in all kinds of situations.

TECHNOLOGIES

I specialise in **React.js** combined with **Redux**, **TypeScript** and **Jest**.

As far as my full-stack pet-projects are concerned, I stick to **MERN** stack, which stands for:

MongoDB (as a database)
Express (Node framework)
Read.js (for interactive UI)
Node (as a server language)

It goes without saying that I am familiar with modern styling tools – SCSS, MUI, Bootstrap and plain CSS3.

SOFT SKILLS

Being a team-player, I am good at communication, which is crucial for achieving ambitious goals. At the same time freelance projects taught me to take responsibility for important decisions and to count on myself.

Constant learning helps me to be creative in problems' solving, which is one of my favourite parts of being a software engineer.
