POMAZKOV ARSENIY

FRONT-END DEVELOPER

EXECUTIVE PROFILE

I am a front-end developer with 2 years experience in building beautiful and functional UI for a huge variety of purposes – from online shops to API services.

Looking for new opportunities and eager to accept challenges!

PREVIOUS POSITIONS

MIDDLE FRONT-END DEVELOPER

VTB | 2020 – present

Working as a front-end engineer at the innovation department, I am engaged in:

- Authentication system's front-end development, including all possible scenarios, validation and warnings (React.js, Router, hooks and functional components – no pre-made components used)
- Single-page applications development: landings, info pages, guides (SCSS, vanilla JS and JQuery animation)
- API portal front-end development on Drupal 8 (Twig template engine usage, custom hooks and theming)
- Project management – being responsible for an innovative AR project, communication with vendors and internal departments

FREELANCER

Upwok | 2020

I started my career on the international freelance platform – Upwork. Not only it helped me to level up my spoken English, I also learnt to communicate with different types of clients and to find ways of reaching agreement in all kinds of situations.

TECHNOLOGIES

I specialise in **React.js** combined with **Redux**, **Router**, **TypeScript** and **Jest**.

As far as my full-stack pet-projects are concerned, I stick to **MERN** stack, which stands for:
MongoDB (as a database)
Express (Node framework)
React.js (for interactive Ui)
Node (as a server language)

It goes without saying that I am familiar with modern styling tools – SCSS, Materialize CSS, Bootstrap and plain CSS3.
